SUMMARY

Full-stack engineer with 3+ years building production web applications in C#/.NET, Angular, TypeScript, PHP and MySQL: engineered cross-application search, designed schemas and indexes, integrated Stripe and Zoho CRM.

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer, Sourcis May 2023 – May 2026
Folsom, CA (Remote)

- Built and expanded a production healthcare management platform in C#/.NET, Angular, TypeScript and MySQL used by approximately 20 internal staff and 4 doctors, working closely with product and marketing to design and ship patient-facing forms, prescription and scheduling functionality.
- Owned the setup, configuration, and ongoing maintenance of CI/CD pipelines using GitHub Actions, automating build, testing, and deployment workflows.
- Designed and built a cross-application full-text search system over patient and operational records (MySQL FULLTEXT indexes), combining query prioritization, fallback matching and result deduplication; p95 under 500 ms in performance tests.
- Optimized database schemas, SQL queries, and indexes to improve search and reporting performance.
- Built a PHP/MySQL analytics platform for marketing and user data that contributed to a 20% increase in conversion rates.
- Troubleshot production issues across the stack and third-party integrations; wrote automated tests to catch regressions earlier and deploy more reliably.
- Developed REST APIs and integrations with services including Stripe and Zoho CRM.

Junior Software Developer in Test, Broadcom Software Sep 2021 – Apr 2022
Vancouver, BC

- Built Python and Selenium test suites (unit, integration, end-to-end, regression and performance) for AppNeta Performance Manager and its REST APIs.
- Configured and maintained CI/CD pipelines in TeamCity to automate application builds and test execution, supporting regression testing, defect verification, and QA workflows.
- Investigated defects across application layers, reproduced issues and verified fixes.

EDUCATION

Bachelor of Science, Computer Science 2018 – 2023
University of British Columbia, Vancouver, BC

PROJECTS

Gigaboard (customizable iOS keyboard app) | Swift In development

- Developing a Swift iOS keyboard app with swipe typing, suggestions, autocorrection and ThumbShift, a gesture for one-handed typing.
- Added an Android-style clipboard with history and reusable snippets, plus controls for typing and swipe behavior, individual key colors, toolbar layout and one-handed width.

Moneycomb (household finance app, in development) | TypeScript, React, Fastify, PostgreSQL Oct 2026 – Present

- Built a responsive household finance app with shared multi-currency budgets, role-based access, historical net worth tracking and idempotent CSV imports.
- Connected FIRE scenario comparisons to monthly investment targets; implemented contribution tracking that distinguishes new funding from internal transfers and trades.

Reddit Sign-In Popup Blocker | JavaScript, Manifest V3, Vitest, jsdom, GitHub Actions Aug 2026

- Shipped a Manifest V3 extension to the Chrome Web Store (82 users) and Firefox Add-ons (35 average daily users) as of Sep 2026; no extension API permissions, network calls or data collection.

SKILLS

Languages: C#, TypeScript/JavaScript, SQL, Swift, Python, PHP
Frameworks & Testing: .NET (ASP.NET Core), Angular, React, Node.js, Fastify, Selenium, Vitest, Playwright
Data & APIs: MySQL, PostgreSQL (relational schema design, query and index optimization), REST API design, Swagger
Cloud & DevOps: AWS, Azure (App Service, MySQL Flexible Server, Blob Storage, Communication Services), Docker, Git, CI/CD (GitHub Actions, TeamCity)
